Re: Permit #: 16-0124R – New Home/Land Balance – Genesee Twp

Dear Sir/Madam,

A review of the above-mentioned project reveals that your Soil Erosion and Sedimentation Control (SESC) permit issued by this office will expire as of May 2, 2018. State law, Part 91 of Act 451 of the Public Acts of 1994, prohibits construction activity without an active SESC permit. As part of the SESC Rule 323.1709, temporary SESC measures shall be in place at all disturbed areas until permanent SESC measures are installed. It is very important that you contact this office immediately, in regards to your scheduling and anticipated completion of this project.

Should your project not be completed with full stabilization by the expiration date listed on your current SESC permit, a new SESC permit will be required. Please complete the attached SESC application packet and include a current SESC plan indicating site conditions along with existing and proposed SESC measures. Our office will determine whether you are eligible for a renewal or if you will need to reapply for a permit.

Please contact our Residential SESC Staff at (810) 732-7870, regarding application and permitting fees, bonding requirements or any other questions you may have.
